

POND STIRRER

Tractor Driven

WILLIAMS

Our reputation is spreading

This is a tractor PTO driven 3 point mounted effluent pond stirrer, used to stir the pond prior to emptying. It has a multi-directional agitator, not a propeller, which minimizes bank scouring and tangling with any rubbish in the pond. It saves considerable time when loading and spreading and ensures even consistency with spreading effluent.

FEATURES

6.5 metres long	Heavy-duty drive shaft
600mm x 300mm Multi Directional Agitator (not a propeller)	Road wheels that swing out of the way when stirring
Totally sealed taper roller bearings	Safety clutch available
Bearings run in oil	NZ Designed and Manufactured
4 heavy neoprene seals running on a stainless shaft	Neat and tidy, easy to use
Adjustable heavy-duty ratchet top-link	Built to last
Built the same for 30 years with a proven sealing system	Cost effective
