

ZERO-0-LOSS

Hydrant Unit

The Basic Hydrant unit comes with the frame and changeover tube with pressure sealing v seals. Just add the inlet and outlet fittings to suit your application. The fittings are available to fit 63mm OD, 75mmOD and 90mm OD alkathene or male thread, straight or angled. Locate hydrants to service the furthestmost area from that point. Situate the hydrant at the side of a raceway and at every second fence line, then you can service four paddocks from one hydrant point using a short feeder line to cross under the raceway.

FEATURES

No head/pressure loss	Extend or alter anytime
Range and size of fittings to suit any configuration	Totally hot-dipped galvanised
Can be used with surface or buried lines	Eliminates pipeline blockages
No buried fittings to corrode	NZ designed and manufactured, patent pending
No sharp bends for sediment build-up	Neat and tidy, easy to use
Quick to change flow direction	Built to last
Self sealing couplings	Cost effective

Zero-0-Loss Hydrant Parts

MODEL

3" Basic Unit (Hydrant)
Includes H3 and 2 x H2

All hydrant fittings have a H4 and
2 x M10 x 30 Cuphead Bolt and Nut
included.

HYDRANT ACCESSORIES

PART	CODE
V Seal (out of change over tube)	H2
Change over pipe (comes with seals)	H3
Clamp for fittings	H4
Cuphead Bolt for bolting clamp to hydrant.	H5
